DESCRIPTION

SZMD0502 is an ultra-low capacitance Transient Voltage Suppressor (TVS) designed to provide electrostatic discharge (ESD) protection for high-speed data interfaces. With typical capacitance of 0.5pF (I/O to I/O) only, SZMD0502 is designed to protect parasitic-sensitive systems against over-voltage and over-current transient events. It complies with IEC 61000-4-2 (ESD), Level 4 ($\pm 15\text{kV}$ air, $\pm 8\text{kV}$ contact discharge), IEC 61000-4-4 (electrical fast transient - EFT) (40A, 5/50 ns), very fast charged device model (CDM) ESD and cable discharge event (CDE), etc.

SZMD0502 uses small SOT-23 package. Each SZMD0502 device can protect two high-speed data lines.

The combined features of low capacitance, small size and high ESD robustness make SZMD0502 ideal for high-speed data port and high-frequency line (e.g., USB 2.0 & DVI) applications.

The low clamping voltage of the SZMD0502 guarantees a minimum stress on the protected IC.
